# Interference Suppression Film Capacitors MKP Radial Potted Type

#### **FEATURES**

- AEC-Q200 qualified (rev. C) up to 105 °C
- Compliant with IEC 60381-14: AMD1 grade IIB for pitch ≥ 15 mm
  - THB: 85 °C / 85 % RH, 500 h at U<sub>RAC</sub>
- Compliant with IEC 60381-14: AMD1 grade IA for pitch < 15 mm</li>
  - THB: 40 °C / 93 % RH, 21 days at U<sub>RAC</sub>
- Material categorization: for definitions of compliance please see <a href="https://www.vishay.com/doc?99912"><u>www.vishay.com/doc?99912</u></a>

RoHS COMPLIANT

#### **APPLICATIONS**

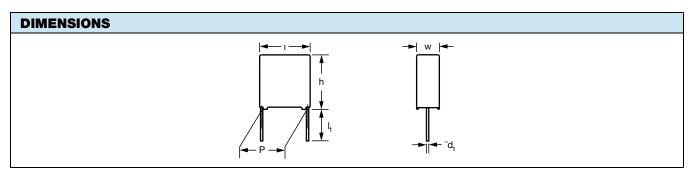

For standard line bypass (between line and ground) Y2 applications

See also application note: <a href="https://www.vishay.com/doc?28153">www.vishay.com/doc?28153</a>

| QUICK REFERENCE DATA                              |  |  |  |
|---|--|--|--|
| Capacitance range (E12 series)                    | 0.001 μF to 0.1 μF (preferred values acc. to E6)   |  |  |
| Capacitance tolerance                             | ± 20 %   |  |  |
| Rated voltage                                     | 300 V <sub>AC</sub> ; 50 Hz to 60 Hz   |  |  |
| Permissible DC voltage                            | 1000 V <sub>DC</sub> at 105 °C<br>1250 V <sub>DC</sub> at 85 °C  |  |  |
| Climatic testing class (asserting to EN 60069. 1) | 55/105/56/C for product volumes ≤ 1750 mm <sup>3</sup>   |  |  |
| Climatic testing class (according to EN 60068-1)  | 55/105/56/B for product volumes > 1750 mm <sup>3</sup>   |  |  |
| Maximum application temperature                   | 105 °C   |  |  |
| Reference standards                               | IEC 60384-14 ed-4 (2013) and EN 60384-14 IEC 60065 requires pass. flamm. class B for volumes > 1750 mm <sup>3</sup> UL 60384-14 2 <sup>nd</sup> edition; CSA E60384-1:14 3 <sup>rd</sup> edition |  |  |
| Dielectric  | Polypropylene film   |  |  |
| Electrodes  | Metallized film  |  |  |
| Construction                                      | Series construction  |  |  |
|   | Triple construction  |  |  |
| Encapsulation                                     | Plastic case, epoxy resin sealed, flame retardant class UL 94 V-0  |  |  |
| Terminals   | Tinned wire  |  |  |
| Marking   | C-value; tolerance; rated voltage; sub-class; manufacturer's type designation; code for dielectric material, manufacturer location; manufacturer's logo, year and week; safety approvals         |  |  |

The ENEC-approval together with the CB-certificate replace all national marks of the following countries (they have already signed the ENEC-agreement): Austria; Belgium; Czech. Republic; Denmark; Finland; France; Germany; Greece; Hungary; Ireland; Italy; Luxembourg; Netherlands; Norway; Portugal; Slovenian; Spain; Sweden, Switzerland and United Kingdom.

#### **MOUNTING**

#### **Normal Use**

The capacitors are designed for mounting on printed-circuit boards. The capacitors packed in bandoleers are designed for mounting in printed circuit boards by means of automatic insertion machines.

For detailed tape specifications refer to packaging information: www.vishay.com/doc?28139

#### Specific Method of Mounting to Withstand Vibration and Shock

In order to withstand vibration and shock tests, it must be ensured that the stand-off pips are in good contact with the printed-circuit board:

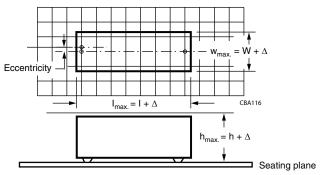

- For pitches ≤ 15 mm capacitors shall be mechanically fixed by the leads
- · For larger pitches the capacitors shall be mounted in the same way and the body clamped

#### **Space Requirements on Printed-Circuit Board**

The maximum space for length ( $I_{max}$ ), width ( $w_{max}$ ), and height ( $h_{max}$ ) of film capacitors to take in account on the printed-circuit board is shown in the drawings:

- For products with pitch  $\leq$  15 mm,  $\Delta w = \Delta l = 0.3$  mm;  $\Delta h = 0.1$  mm
- For products with 15 mm < pitch,  $\leq$  27.5 mm,  $\Delta w = \Delta l = 0.5$  mm;  $\Delta h = 0.1$  mm

Eccentricity defined as in drawing. The maximum eccentricity is smaller than or equal to the lead diameter of the product concerned.

#### **SOLDERING CONDITIONS**

For general soldering conditions and wave soldering profile, we refer to the application note: "Soldering Guidelines for Film Capacitors": <a href="https://www.vishay.com/doc?28171">www.vishay.com/doc?28171</a>

#### Storage Temperature

 $T_{stg}$  = -25 °C to +35 °C with RH maximum 75 % without condensation

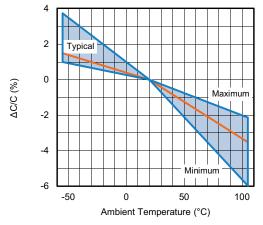

#### **Ratings and Characteristics Reference Conditions**

Unless otherwise specified, all electrical values apply to an ambient temperature of 23 °C  $\pm$  1 °C, an atmospheric pressure of 86 kPa to 106 kPa and a relative humidity of 50 %  $\pm$  2 %.

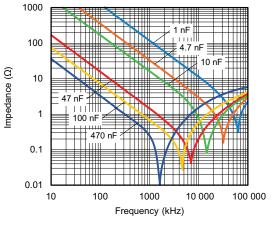

For reference testing, a conditioning period shall be applied over 96 h  $\pm$  4 h by heating the products in a circulating air oven at the rated temperature and a relative humidity not exceeding 20 %.

### Vishay Roederstein

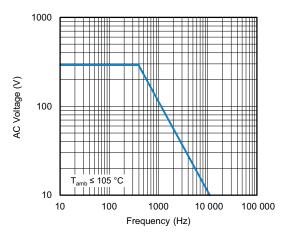

#### **CHARACTERISTICS**

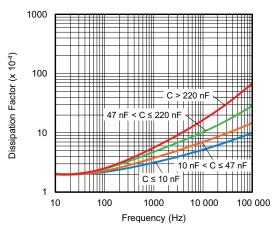

Capacitance as a function of ambient temperature (typical curve)

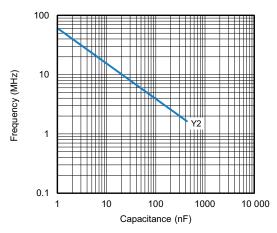

Impedance as a function of frequency (typical curve)

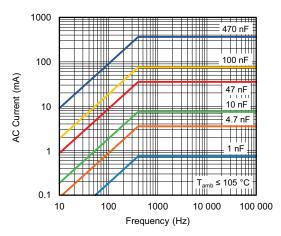

Max. RMS voltage as a function of frequency

Tangent of loss angle as a function of frequency (typical curve)

Resonant frequency as a function of capacitance (typical curve)

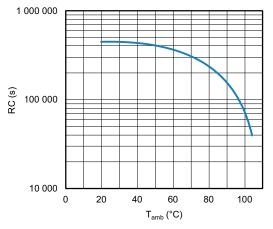

Max. RMS current as a function of frequency

www.vishay.com

Vishay Roederstein

Insulation resistance as a function of ambient temperature

#### **APPLICATION NOTES**

- For X2 electromagnetic interference suppression in standard across the line application (50 Hz / 60 Hz) with a maximum mains voltage of 310 V<sub>AC</sub>
- For series impedance applications we refer to the "Application Note": <a href="www.vishav.com/doc?28153">www.vishav.com/doc?28153</a>
- For capacitors connected in parallel, normally the proof voltage and possibly the rated voltage must be reduced. For information depending of the capacitance value and the number of parallel connections contact: <a href="mailto:rfi@vishay.com">rfi@vishay.com</a>
- These capacitors are not intended for continuous pulse applications. For these situations, capacitors of the AC and pulse program must be used
- The maximum ambient temperature must not exceed 110 °C (125 °C for less than 1000 h) for C ≤ 470 nF and 110 °C for C > 470 nF
- Rated voltage pulse slope:
   If the pulse voltage is lower than the rated voltage, the values of the specific reference data can be multiplied by 435 V<sub>DC</sub> and divided by the applied voltage

#### **INSPECTION REQUIREMENTS**

#### **General Notes**

Sub-clause numbers of tests and performance requirements refer to the "Sectional Specification, publication IEC 60384-14 ed-4 (2013) and Specific Reference Data".

### **Disclaimer**

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Hyperlinks included in this datasheet may direct users to third-party websites. These links are provided as a convenience and for informational purposes only. Inclusion of these hyperlinks does not constitute an endorsement or an approval by Vishay of any of the products, services or opinions of the corporation, organization or individual associated with the third-party website. Vishay disclaims any and all liability and bears no responsibility for the accuracy, legality or content of the third-party website or for that of subsequent links.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
