## **UV SMD LED With Silicone Lens**

### **LINKS TO ADDITIONAL RESOURCES**

#### **DESCRIPTION**

VLMU1610-365-135 is a ceramic based mid power UV LED with silicone lens for long life time. The package size is 1.6 mm x 1.6 mm and the radiant power up to 26 mW at 20 mA in a wavelength range of 362.5 nm to 370 nm.

## PRODUCT GROUP AND PACKAGE DATA

• Product group: LED

Package: SMD ceramic mid power
Product series: mid power UV LED
Angle of half intensity: ± 67.5°

• Lead-finishing: Au

#### **SAFETY ADVICES**

Depending on the mode of operation, these devices emit highly concentrated non visible ultraviolet light which can be hazardous to the human eye. Products which incorporate these devices have to follow the safety precautions given in IEC 62471 "Photobiological Safety of Lamps and Lamp Systems".

#### **FEATURES**

- Ceramic SMT package with silicone lens
- Dimension (L x W x H) in mm: 1.6 x 1.6 x 1.4
- Forward current: up to 60 mA<sub>DC</sub>
- Radiant power (typ.): 25 mW at 20 mA, 68 mW at 60 mA
- · Materials:
- Die: InGaN
- Resin: silicone (water clear)
- Leads / terminations finish: gold plated (Au)
- Grouping parameters:
- Radiant power
- Peak wavelength
- Forward voltage
- · Reflow soldering method
- MSL 3 according to J-STD-020
- Packaging: MOQ = 6000 pieces; 12 mm tape with 1500 pieces per reel, Ø 180 mm (7")
- Material categorization: for definitions of compliance please see <a href="https://www.vishav.com/doc?99912"><u>www.vishav.com/doc?99912</u></a>

### **APPLICATIONS**

- · Industrial curing
- · Photocatalytic purification
- · Poster printing curing
- · Counterfeit money detector
- Blood detector
- Nail curing
- Teeth curing

#### Note

The optical and electrical specification table shows the parameter ranges, comprising only a few classification groups. In order to ensure
availability, single groups for radiant intensity, wavelength, and forward voltage will not be orderable. Only one group for radiant intensity,
wavelength, and forward voltage will be shipped in any one reel.

#### HANDLING RECOMMENDATIONS

In order to achieve excellent lifetime, the package of these UV-LEDs consists of a ceramic substrate in combination with a UV stable silicone as lens material. Compared to standard materials silicone is generally softer and it tends more to attract dust:

- Minimize the level of dirt and dust particles in contact with the LED
- Small amounts of particles on the LEDs, although noticeable from a cosmetic point of view, do not affect the performance in terms of brightness, reliability and quality
- If cleaning is required, a short rinsing with isopropy alcohol, not longer than 15 seconds, is recommended. Do not use ultrasonic cleaning, it may damage the LED
- Do not apply mechanical stress on the silicone lens
- Avoid any piercing of the silicone lens by sharp objects
- It is recommended to use a suitable pick and place tool for the removal of the LED from blister tape without applying stress to the lens. The recess of the pick-up needle has to be larger than the silicone lens
- For manual handling using tweezers make sure that the LED will be touched carefully at the sidewall of the ceramic substrate, but not at the silicone lens

#### **DRY PACKING**

The reel is packed in an anti-humidity bag to protect the devices from absorbing moisture during transportation and storage.

## **FINAL PACKING**

The sealed reel is packed into a cardboard box. A secondary cardboard box is used for shipping purposes.

#### RECOMMENDED METHOD OF STORAGE

Dry box storage is recommended as soon as the aluminum bag has been opened to prevent moisture absorption. The following conditions should be observed, if dry boxes are not available:

- Storage temperature 10 °C to 30 °C
- Storage humidity ≤ 60 % RH max.

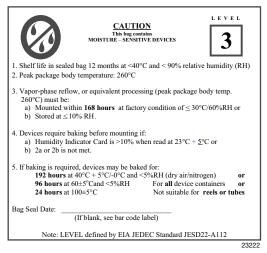

After more than 168 h under these conditions moisture content will be too high for reflow soldering.

In case of moisture absorption, the devices will recover to the former condition by drying under the following condition: 192 h at 40 °C + 5 °C / - 0 °C and < 5 % RH (dry air / nitrogen) or

96 h at 60 °C + 5 °C and < 5 % RH for all device containers or

24 h at 100 °C + 5 °C not suitable for reel or tubes.

An EIA JEDEC® standard JESD22-A112 level 3 label is included on all dry bags.

Example of JESD22-A112 level 3 label

## **ESD PRECAUTION**

Proper storage and handling procedures should be followed to prevent ESD damage to the devices especially when they are removed from the antistatic shielding bag. Electrostatic sensitive devices warning labels are on the packaging.
