

Series Impedance Film Capacitors Radial Potted Type

APPLICATIONS

Based on long term capacitance stability and good self-healing properties, these capacitors are intended for applications in series with the mains acting as voltage-dividing impedance.

These capacitors are <u>not allowed</u> to be used as across-the-line capacitors.

REFERENCE SPECIFICATIONS

IEC 60384-14

PERFORMANCE GRADE

Grade 1 (long life)

MARKING

C-value, tolerance, rated voltage, manufacturer's type, code for dielectric material, manufacturer's location, manufacturer's logo, year and week

DIELECTRIC

Polyester film (1)

ELECTRODES

Metallized electrodes

CONSTRUCTION

Series construction

RATED AC VOLTAGE

AC 275 V; 50 Hz to 60 Hz

PERMISSIBLE DC VOLTAGE

DC 400 V

Notes

(1) For pitch = 15 mm, C < 15 nF, dielectric is polypropylene (2) 27.5 mm pitch parts - in progress

FEATURES

- 10 mm to 27.5 mm lead pitch (2)
- Supplied loose in box, taped on ammopack or reel
- Compliant to RoHS Directive 2002/95/EC

ENCAPSULATION

Plastic case, epoxy resin sealed, flame retardant (UL-class 94 V-0)

CLIMATIC TESTING CLASS ACC. TO IEC 60068-1 55/105/56/B

CAPACITANCE RANGE AND TOLERANCE (2)

E6 series 0.01 μF to 2.2 μF , tolerance ± 20 % E12 series 0.01 μF to 2.2 μF , tolerance ± 10 % and ± 5 % Preferred values acc. to E6

LEADS

Tinned wire

RATED TEMPERATURE

110 °C

MAXIMUM APPLICATION TEMPERATURE

105 °C

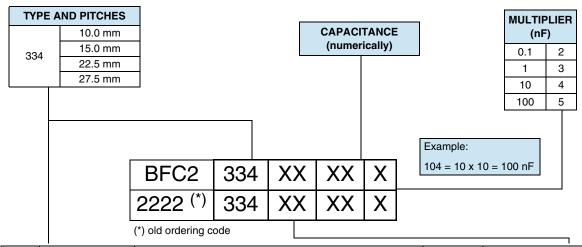

DETAIL SPECIFICATION

MOUNTING

Normal Use

The capacitors are designed for mounting on printed-circuit boards. The capacitors packed in bandoliers are designed for mounting in printed-circuit boards by means of automatic insertion machines.

For detailed tape specification refer to "Packaging Information" www.vishav.com/doc?28139

Specific Method of Mounting to Withstand Vibration and Shock

In order to withstand vibration and shock tests, it must be ensured that the stand-off pips are in good contact with the printed-circuit board:

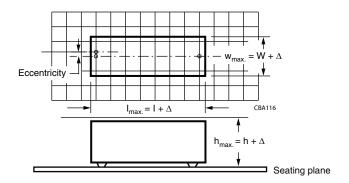

- For pitches ≤ 15 mm capacitors shall be mechanically fixed by the leads
- For larger pitches the capacitors shall be mounted in the same way and the body clamped

Space Requirements on Printed Circuit Board

The maximum space for length $(I_{max.})$, width $(w_{max.})$ and height $(h_{max.})$ of film capacitors to take in account on the printed-circuit board is shown in the drawings.

- For products with pitch \leq 15 mm, $\Delta w = \Delta I = 0.3$ mm; $\Delta h = 0.1$ mm
- For products with 15 mm < pitch \leq 27.5 mm, $\Delta w = \Delta I = 0.5$ mm; $\Delta h = 0.1$ mm

Eccentricity defined as in drawing. The maximum eccentricity is smaller than or equal to the lead diameter of the product concerned.

SOLDERING CONDITIONS

For general soldering conditions and wave soldering profile, we refer to the application note:

"Soldering Guidelines for Film Capacitors": www.vishay.com/doc?28171

Storage Temperature

• Storage temperature: T_{stq} = - 25 °C to + 40 °C with RH maximum 80 % without condensation

Ratings and Characteristics Reference Conditions

Unless otherwise specified, all electrical values apply to an ambient temperature of 23 °C \pm 1 °C, an atmospheric pressure of 86 kPa to 106 kPa and a relative humidity of 50 % \pm 2 %.

For reference testing, a conditioning period shall be applied over 96 h \pm 4 h by heating the products in a circulating air oven at the rated temperature and a relative humidity not exceeding 20 %.

APPLICATION NOTES

- These capacitors are suitable for the application as voltage-division impedance in series with the mains (50 Hz/60 Hz) with a
 maximum mains voltage of U_{RAC}.
- For capacitors connected in parallel, normally the proof voltage and possibly the rated voltage must be reduced. For information depending of the capacitance value and the number of parallel connections contact: dc-film@vishav.com
- These capacitors are not suitable for mains applications as across-the-line capacitors without additional protection, as described under item 7. These mains applications are strictly regulated in safety standards and therefore electromagnetic interference suppression capacitors conforming the standards must be used.
- The peak voltage (Up) shall not be greater than the permissible DC voltage (URDC).
- The peak-to-peak voltage (U_{D-D}) shall not be greater than 2 √2 x U_{RAC} to avoid the ionization inception level.
- The voltage peak slope (dU/dt) shall not exceed the rated voltage pulse slope in an RC-circuit at rated voltage and without
 ringing. If the pulse voltage is lower than the rated DC voltage, the rated voltage pulse slope may be multiplied by U_{RDC} and
 divided by the applied voltage.

For all other pulses following equation must be fulfilled:

$$2 \times \int_{0}^{T} \left(\frac{dU}{dt}\right)^{2} x dt < U_{RDC} \times \left(\frac{dU}{dt}\right)_{rated}$$

- T is the pulse duration
- The rated voltage pulse slope is valid for ambient temperatures up to 105 °C.
- The maximum component surface temperature must be lower than 105 °C.
- Since in circuits used at voltages over 280 V peak-to-peak the risk for an intrinsically active flammability after a capacitor breakdown (short circuit) increases, it is recommended that the power to the component is limited to 100 times the values mentioned in the table: "Heat conductivity". This is normally fulfilled by the impedance of the device in series with capacitor or by an additional resistor.

| 4.9.2 Final measurements | Visual examination | No visible damage |
| | Capacitance | $ \Delta C/C \leq 5$ % of the value measured initially. |
| | Tangent of loss angle | Increase of tan δ : |
| | | ≤ 0.008 for: C ≤ 1 μF or |
| | | ≤ 0.005 for: C > 1 μF |
| | | Compared to values measured initially |
| | Insulation resistance | As specified in section "Specific Reference Data" |
| | | of this specification |
| SUB-GROUP C1 COMBINED SAMPLE OF SPECIMENS OF SUB-GROUPS C1A AND C1B | | |
| 4.11 Climatic sequence | | |
| 4.11.1 Initial measurements | Capacitance | |
| | Measured in 4.4.2 and 4.9.2 | |
| | Tangent of loss angle: | |
| | Measured initially in C1A and C1B | |
| 4.11.2 Dry heat | Temperature: 105 °C Duration: 16 h | |
| 4.11.3 Damp heat cyclic Test Db First cycle | | |
| 4.11.4 Cold | Temperature: - 55 °C Duration: 2 h | |
| 4.11.5 Damp heat cyclic Test Db remaining cycles | | |
| 4.11.6 Final measurements | Visual examination | No visible damage |
| | Capacitance | Legible marking $ \Delta C/C \le 5\%$ of the value measured in 4.11.1. |
| | Tangent of loss angle | Increase of tan δ: |
| | .agant or loop ungro | \leq 0.008 for: C \leq 1 μ F or |
| | | ≤ 0.005 for: C > 1 µF |
| | | Compared to values measured in 4.11.1. |
| | Voltage proof | No permanent breakdown or flash-over |
| | 720 V _{DC} , 1 min between terminations | The permanent and analysis of the permanent and |
| | Insulation resistance | ≥ 50 % of values specified in section "Specific |
| | | Reference Data" of this specification |

Series Impedance Film Capacitors Radial Potted Type

| SUB-CLAUSE NUMBER AND TEST | CONDITIONS | PERFORMANCE REQUIREMENTS |
|------------------------------|--|--|
| SUB GROUP C2 | | |
| 4.12 Damp heat steady state | 56 days; 40 °C; 90 % to 95 % RH | |
| | no load | |
| 4.12.1 Initial measurements | Capacitance | |
| | Tangent of loss angle: | |
| | At 1 kHz | |
| 4.12.3 Final measurements | Visual examination | No visible damage |
| | | Legible marking |
| | Capacitance | $ \Delta C/C \le 5$ % of the value measured in 4.12.1. |
| | Tangent of loss angle | Increase of tan δ : |
| | | ≤ 0.008 for: C ≤ 1 μF or |
| | | ≤ 0.005 for: C > 1 μF |
| | | Compared to values measured in 4.12.1. |
| | Voltage proof | No permanent breakdown or flash-over |

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Hyperlinks included in this datasheet may direct users to third-party websites. These links are provided as a convenience and for informational purposes only. Inclusion of these hyperlinks does not constitute an endorsement or an approval by Vishay of any of the products, services or opinions of the corporation, organization or individual associated with the third-party website. Vishay disclaims any and all liability and bears no responsibility for the accuracy, legality or content of the third-party website or for that of subsequent links.

Vishay products are not designed for use in life-saving or life-sustaining applications or any application in which the failure of the Vishay product could result in personal injury or death unless specifically qualified in writing by Vishay. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
