**Notes:**

1. Suitable for Factory wiring only.
2. Suitable for Field and Factory wiring.
3. Series External Impedance required, see Electrical Ratings in the Recognition report.
4. Series External Overcurrent Protection required, see Electrical Ratings in the Recognition report.
5. Body of discrete component metal-oxide varistors (MOVs) flammability:
  - a) Min. V-0 or VTM-0.
  - b) Min. V-1 or VTM-1.
  - c) Complies with IEC 60950-1, Edition 2.2, Annex Q/IEC62368-1 Annex G.8.2 needle flame testing requirements.
  - d) Complies with IEC 60065, Edition 7.2, Annex G.1.1 needle flame testing requirements.

SPDs investigated for Type 1 applications are automatically suitable for Type 2 applications and may be marked for SPD Type 1 and/or Type 2 applications. SPDs only marked "SPD Type 2" are not suitable for Type 1 applications.

Where a minimum ambient temperature is not specified, assume 0°C unless the product is marked otherwise or with an Outdoor use Environmental Rating. See Electrical Equipment for Use in Ordinary Locations (AALZ) for details regarding Environmental Ratings.

# - The S or H in the model number can be replaced by C.

Note - The suffix P, M, L or K of all models is optional, and may be followed by A thru Z for marketing purpose.

[%] - All types may be followed by additional letters and/or numbers

SURGE-PROTECTIVE DEVICES CERTIFIED FOR CANADA - COMPONENT | UL Product iQ

**UL Product iQ™**

## VZCA8.GuideInfo - SURGE-PROTECTIVE DEVICES CERTIFIED FOR CANADA - COMPONENT

### Surge-protective Devices Certified for Canada - Component

The devices covered under this category are incomplete in certain constructional features or restricted in performance capabilities and are intended for use as components of complete equipment submitted for investigation rather than for direct separate installation in the field. THE FINAL ACCEPTANCE OF THE COMPONENT IS DEPENDENT UPON ITS INSTALLATION AND USE IN COMPLETE EQUIPMENT SUBMITTED TO UL.

#### GENERAL

This category covers component surge-protective devices (SPDs) designed for repeated limiting of transient-voltage surges on power circuits within products not exceeding 750 V ac or 1060 V dc, or 1500 V dc for photovoltaic (PV) SPDs as follows:

#### Investigated to Other Than CSA-C22.2 No. 269

Type 4 SPDs are intended only for factory installation within another component, device or product.

Type 4 SPDs are (1) discrete devices, such as gas-discharge tubes, metal-oxide varistors (MOVs), and avalanche junction diodes, or (2) combinations of such devices, that are not provided with enclosures, have enclosures that are incomplete, or are otherwise unsuitable for direct field installation or direct connection to a branch circuit.

Type 4 SPDs have been tested to verify that the average of the transient-voltage surges is limited to the Voltage Protection Rating (VPR).

Type 4 SPDs are surge tested and marked based on the intended application as Type 1, 2 or 3 SPDs.

Type 4 SPDs intended for other than SPD applications (use in ITE, appliances, etc.) may be tested to the manufacturer's specifications.

Type 5 SPDs and Types 1, 2, 3 and 4 component assemblies are intended only for factory installation within another component, device or product.

Type 5 SPDs are discrete component surge suppressors, such as MOVs that may be mounted on a printed wiring board, connected by its leads or provided within an enclosure with mounting means and wiring terminations.

Type 4 component assemblies are assemblies consisting of one or more Type 5 SPDs together with a disconnect (integral or external) or a means of complying with the limited current tests in ANSI/UL 1449, "Surge Protective Devices."

Type 5 SPD discrete components and Type 4 component assemblies are rated in nominal discharge current ( $I_n$ ), measured limiting voltage (MLV), normal operating voltage and maximum continuous operating voltage (MCOV).

Types 1, 2 and 3 component assemblies consist of a Type 4 component assembly with internal or external short-circuit protection. These types are tested and rated based on the intended application as either Type 1, 2 or 3 SPDs.

#### Investigated to CSA-C22.2 No. 269

Types 4-1, 4-2, 4-3 component assemblies and Type 5 SPDs are intended only for factory installation within another component, device or product.

Type 5 SPDs are discrete component surge suppressors, such as MOVs that may be mounted on a printed wiring board, connected by its leads or provided within an enclosure with mounting means and wiring terminations.

Type 5 SPDs designated as Type 4CA in the individual Reports and certifications are assemblies consisting of one or more Type 5 SPDs together with a disconnect (integral or external) or a means of complying with the Abnormal overvoltage - Limited current behavior and other applicable tests in CSA-C22.2 No. 269.4, "Surge Protective Devices - Type 4 - Component Assemblies."

SPD accessories are components intended for factory installation in conjunction with SPD devices. Refer to the Conditions of Acceptability in the individual Reports for additional details.

See Surge-protective Devices Certified for Canada (VZCA7) for definitions of SPD Types 1, 2 and 3.

#### CONDITIONS OF ACCEPTABILITY

Unless specified otherwise in the individual Reports, consideration is to be given to the following Conditions of Acceptability when these components are employed in the end-use equipment:

1. MLV values provided are for reference only and shall not represent the VPR of an end product, as final installation, construction and internal wiring of an end product may affect the VPR.

2. Voltage Protection Rating (VPR) shall be determined in the end product where they are applicable. The VPR for Type 1, Type 2 and Type 3 component assemblies are for reference only and shall not represent the VPR of an end product, as final installation, construction and internal wiring of an end product may affect the VPR.

3. Type 4CA and Type 5 SPDs have not been subjected to the Abnormal overvoltage - Short circuit and intermediate current behavior tests as required by Abnormal overvoltage - Short circuit and intermediate current behavior tests in CSA-C22.2 No. 269.4. The suitability of these devices to comply with these tests in the end-use application shall be determined. If the integral thermal responsive device opens during testing (in the end-use application), the test shall be conducted two more times and subjected to annual follow-up testing.

4. Type 5 SPDs have not been subjected to the Abnormal overvoltage - Limited current behavior tests as required by CSA-C22.2 No 269.4. The suitability of these devices to comply with these tests in the end-use application shall be determined.

#### SURGE-PROTECTIVE DEVICES CERTIFIED FOR CANADA - COMPONENT | UL Product iQ

5. SPDs with Note 1 indicated in the electrical ratings table are intended for factory wiring only with the suitability of the connections (including spacings between factory connectors) determined in the end-use application.

SPDs with Note 2 indicated in the electrical ratings table are suitable for factory and field wiring see the individual report for wire size and torque ratings.

6. The suitability of Type 5 components, with a Nominal Discharge Current Rating ( $I_n$ ) less than 3 kA, in the end-use application may necessitate additional testing in accordance with one or more of the following:

CSA-C22.2 No. 269.1, "Surge Protective Devices - Type 1 - Permanently Connected"

CSA-C22.2 No. 269.2, "Surge Protective Devices - Type 2 - Permanently Connected"

CSA-C22.2 No. 269.3, "Surge Protective Devices - Type 3 - Cord Connected, Direct Plug-in and Receptacle Type"

CSA-C22.2 No. 269.4, "Surge Protective Devices - Type 4 - Component Assemblies"

CSA-C22.2 No. 269.5, "Surge Protective Devices - Type 5 - Components"

Additional Conditions of Acceptability may be included in the Report available from the manufacturer.

#### CODES

The following summarizes and defines the codes shown in the individual Recognitions.

<b>SPD Type</b>	
1CA	Type 1 component assembly (Legacy)
2CA	Type 2 component assembly (Legacy)
3CA	Type 3 component assembly (Legacy)
4-1	Type 4-1 component assembly
4-2	Type 4-2 component assembly
4-3	Type 4-3 component assembly
4CA	Type 4 component assembly (Legacy)/Type 5 SPD (Present)
5	Type 5 SPD
<b>ACC</b>	SPD accessory for use in conjunction with an SPD device, such as an alarm, counter, base, etc.
<b>Volts (V)</b>	The rated operating voltage of the SPD
<b>PH (Phase)</b>	
1	Single phase alternating current (50/60 Hz)
1S	Split single phase alternating current (50/60 Hz)
3Y	Three-phase wye alternating current (50/60 Hz)
3H	Three-phase high-leg delta alternating current (50/60 Hz)
3D	Three-phase delta alternating current (50/60 Hz)
DC	Direct current
DC PV	Direct current for use in photovoltaic applications only
<b>Amps (A)</b>	Amperage; applies to two-port SPDs only
<b>Amb (°C) Min/Max</b>	Minimum and Maximum ambient temperature rating of SPD
<b>Mode</b>	Refers to the pair of electrical connections (terminals) between which the specified ratings apply
Ld	Lead
L	Line
N	Neutral
G	Ground
H	High leg

SURGE-PROTECTIVE DEVICES CERTIFIED FOR CANADA - COMPONENT | UL Product iQ

<b>DC+</b>	DC positive
<b>DC-</b>	DC negative
<b>VPR (Vpk): Voltage Protection Rating (VPR)</b>	Types 1, 2 and 3 component assemblies only (Legacy)
<b>MLV (Vpk): Measured Limited Voltage (MLV)</b>	Type 4 component assemblies and Type 5 SPDs (Legacy)
<b>MCOV (V)</b>	The maximum continuous operating voltage
<b>V<sub>n</sub> (Vdc)</b>	Nominal varistor voltage at 1 mA dc with a +/- 10% voltage tolerance; Type 4 component assemblies and Type 5 SPDs only. Type 4 component assemblies and Type 5 SPDs that would be damaged by the 1.0 mA dc current may have been subjected to the Metal Oxide Varistor Voltage Test with a dc current less than 1.0 mA. Check the Conditions of Acceptability in the individual Recognition Reports for additional details. (Legacy)
<b>I<sub>n</sub> (kA)</b>	Nominal discharge current rating, kA
<b>SCCR (kA)</b>	Short-circuit-current rating in kA; Type 1, 2, 4-1 and 4-2 component assemblies only

SPDs investigated for Type 1/4-1 applications are automatically suitable for Type 2/4-2 applications and may be marked for SPD Type 1/4-1 and/or Type 2/4-2 applications. SPDs only marked "SPD Type 2/4-2" are not suitable for Type 1/4-1 applications.

## FACTORS NOT INVESTIGATED

The effect of the surge protector on connected loads, the effect of the surge protector on harmonic distortion of the supply voltage, and the adequacy of the surge protector to protect connected equipment from damage due to transient-voltage surges has not been investigated.

## REQUIREMENTS

The basic requirements used to investigate products in this category are contained in CSA Electrical Certification Notice No. 516, "Surge/Transient Voltage Suppressors." CSA-C22.2 No. 8, "Electromagnetic Interference (EMI) Filters," is additionally used as a guide.

The basic standard used to investigate Type 4-1, 4-2 and 4-3 component assemblies, other than dc and PV, in this category is CSA-C22.2 No. 269.4, "Surge Protective Devices - Type 4 - Component Assemblies."

The basic standard used to investigate Type 5 SPDs in this category is CSA-C22.2 No. 269.5, "Surge Protective Devices - Type 5 - Components."

The basic standard used to investigate dc and PV Type 4-1, 4-2 and 4-3 component assemblies in this category is CSA-C22.2 No. 8, in addition to the requirements contained in CSA Electrical Certification Notice No. 516.

Where indicated in the individual Recognitions, the body of discrete component metal-oxide varistors (MOVs) have also been investigated for flammability with respect to the V-0, VTM-0, V-1 or VTM-1 flammability rating, for compliance with the needle flame testing requirements in Annex Q of IEC 60950-1, "Information Technology Equipment - Safety - Part 1: General Requirements," and Annex G.8.2 of IEC 62368-1, "Audio/Video, Information and Communication Technology Equipment - Part 1: Safety Requirements," or Annex G.1.1 of IEC 60065, "Audio, Video and Similar Electronic Apparatus - Safety Requirements."

## UL MARKING

Components Recognized under UL's Component Recognition Program are identified by markings consisting of the Recognized company's identification and catalog, model or other product designation on the product or on the smallest unit container in which the product is packaged. In addition, components produced under the UL Component Recognition Program will also bear the Recognized Component Mark for Canada .

The Listing or Classification Mark of UL is not authorized for use on, or in connection with, Recognized Components. Only those components that actually bear the "Marking" should be considered as being covered under the Component Recognition Program.

\* \* \* \* \*

UL, in performing its functions in accordance with its objectives, does not assume or undertake to discharge any responsibility of the manufacturer or any other party. UL shall not incur any obligation or liability for any loss, expense or damages, including incidental or consequential damages, arising out of or in connection with the use, interpretation of, or reliance upon this Guide Information.

Last Updated on 2018-11-09

The appearance of a company's name or product in this database does not in itself assure that products so identified have been manufactured under UL's Follow-Up Service. Only those products bearing the UL Mark should be considered to be Certified and covered under UL's Follow-Up Service. Always look for the Mark on the product.
