# Automotive N-Channel 80 V (D-S) 175 °C MOSFET

PRODUCT SUMMARY	
V <sub>DS</sub> (V)	80
$R_{DS(on)}$ ( $\Omega$ ) at $V_{GS}$ = 10 V	0.0082
$R_{DS(on)}$ ( $\Omega$ ) at $V_{GS}$ = 4.5 V	0.0112
I <sub>D</sub> (A)	60
Configuration	Single

#### **FEATURES**

- TrenchFET<sup>®</sup> power MOSFET
- AEC-Q101 qualified
- 100 %  $R_q$  and UIS tested
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

#### Notes

a. Package limited

b. Pulse test; pulse width  $\leq$  300 µs, duty cycle  $\leq$  2 %

c. When mounted on 1" square PCB (FR4 material)

d. See solder profile (<u>www.vishay.com/doc?73257</u>). The PowerPAK SO-8L is a leadless package. The end of the lead terminal is exposed copper (not plated) as a result of the singulation process in manufacturing. A solder fillet at the exposed copper tip cannot be guaranteed and is not required to ensure adequate bottom side solder interconnection

e. Rework conditions: manual soldering with a soldering iron is not recommended for leadless components

Notes

a. Pulse test; pulse width  $\leq$  300 µs, duty cycle  $\leq$  2 %.

b. Guaranteed by design, not subject to production testing.

c. Independent of operating temperature.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

#### Note

• The characteristics shown in the two graphs

- Normalized Transient Thermal Impedance Junction-to-Ambient (25 °C)

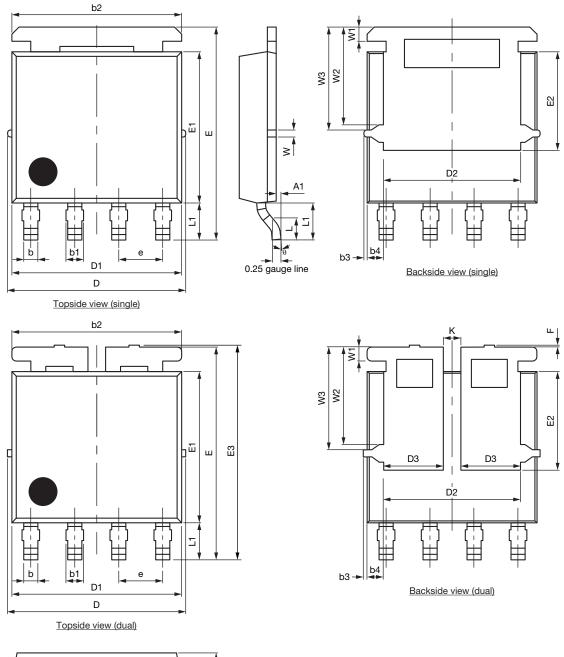

- Normalized Transient Thermal Impedance Junction-to-Case (25 °C)

are given for general guidelines only to enable the user to get a "ball park" indication of part capabilities. The data are extracted from single pulse transient thermal impedance characteristics which are developed from empirical measurements. The latter is valid for the part mounted on printed circuit board - FR4, size 1" x 1" x 0.062", double sided with 2 oz. copper, 100 % on both sides. The part capabilities can widely vary depending on actual application parameters and operating conditions.

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations.
