Silicon NPN Phototransistor, RoHS Compliant

DESCRIPTION
TEMT1000 series are silicon NPN phototransistors with high radiant sensitivity in black, surface mount, plastic packages with lens and daylight blocking filter. Filter bandwidth is matched with 870 nm to 950 nm IR emitters.

FEATURES
- Package type: surface mount
- Package form: GW, RGW, yoke, axial
- Dimensions (L x W x H in mm): 2.5 x 2 x 2.7
- High radiant sensitivity
- Daylight blocking filter matched with 870 nm to 950 nm IR emitters
- Fast response times
- Angle of half sensitivity: \( \varphi = \pm 15^\circ \)
- Package matches with IR emitter series TSML1000
- Floor life: 168 h, MSL 3, acc. J-STD-020
- Compliant to RoHS Directive 2002/95/EC and in accordance with WEEE 2002/96/EC

APPLICATIONS
- Detector in electronic control and drive circuits
- IR detector for daylight application
- Photo interrupters
- Counter
- Encoder

PRECAUTIONS FOR USE

1. Over-current-proof
Customer must apply resistors for protection, otherwise slight voltage shift will cause big current change (burn out will happen).

2. Storage
• Storage temperature and rel. humidity conditions are: 5 °C to 35 °C, R.H. 60 %.
• Floor life must not exceed 168 h, acc. to JEDEC level 3, J-STD-020.
   Once the package is opened, the products should be used within a week. Otherwise, they should be kept in a damp proof box with desiccant.
   Considering tape life, we suggest to use products within one year from production date.
• If opened more than one week in an atmosphere 5 °C to 35 °C, R.H. 60 %, devices should be treated at 60 °C ± 5 °C for 15 h.
• If humidity indicator in the package shows pink color (normal blue), then devices should be treated with the same conditions as 2.3.
