### Vishay Semiconductors

# **IR Sensor Module for Remote Control Systems**

**FEATURES** 

**RoHS** 

· Improved shielding against electrical field disturbance

- AGC to suppress ambient noise
- · High sensitivity, long receiving range
- Supply voltage: 2.5 V to 5.5 V
- · Carrier out signal for IR repeater applications
- Material categorization: for definitions of compliance please see www.vishav.com/doc?99912

### **LINKS TO ADDITIONAL RESOURCES**

#### **DESCRIPTION**

The TSMP58138 is a miniaturized sensor for receiving the modulated signal of infrared remote control systems. A PIN diode and preamplifier are assembled on a lead frame, the epoxy package is designed as an IR filter. The modulated output signal, carrier out, can be used for repeater applications and code learning applications.

This component has not been qualified according to automotive specifications.

#### **MECHANICAL DATA**

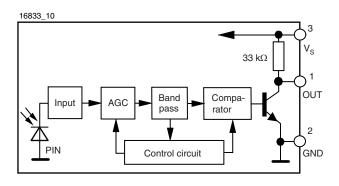

#### Pinning:

1 = carrier OUT, 2 = GND, 3 = V<sub>S</sub>

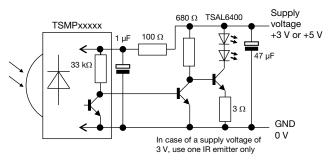

#### **ORDERING CODE**

TSMP58138 - 1500 pieces in bags

### **BLOCK DIAGRAM**

### **APPLICATION CIRCUIT**

Recommended circuit for best sensitivity in repeater applications. It limits the output voltage swing V<sub>o</sub> to about 0.7 V in order to avoid internal coupling.

### End of Life May-2023 - Alternative Device: TSMP98100

#### Note

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress rating only
and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of this specification
is not implied. Exposure to absolute maximum rating conditions for extended periods may affect the device reliability
