

## High Speed Optocoupler, 1 MBd, Photodiode With Transistor Output

### DESCRIPTION

The 1 MBd high speed optocoupler consists of a GaAlAs infrared emitting diode, optically coupled with an integrated photo detector and a high speed transistor. The open collector output function allows circuit designers to adjust the load conditions when interfacing with different logic systems such as TTL, CMOS, etc.

The PSpice models are written from device characterization data for simulation. All symbols are in the symbol library file VOM452.olb. All model data are in the PSpice model library file VOM452.lib.

This document is intended as a PSpice modeling guideline and does not constitute a commercial product, neither a substitute to datasheet.

| PART   | MODEL DESCRIPTION  | SYMBOL FILE  | MODEL FILE |
|--------|--|--|------------|
| VOM452 | High speed optocoupler,<br>1 MBd, photodiode with<br>transistor output | <br>VOM452<br>VOM452.olb | VOM452.lib |

### RECOMMENDED USE OF THE MODEL

- This model is designed only for use at 25 °C and should be used as is.
- This model has been created and tested with OrCAD version 16.6.
- The olb file (symbol) is not down-compatible. Users of the earlier versions need to create the symbols on their platform and associate with relative PSpice model data.

### NETLIST OF MODEL

Following list shows the netlist of the model:

\* Note:

\* Although models can be a useful tool in evaluating device performance, they cannot model exact device performance under all conditions, nor are they intended to replace breadboarding for final verification!

\* Models provided by VISHAY Semiconductors GmbH are not as fully representing all of the specifications and operating characteristics of the semiconductor product to which the model relates.

\* The models describe the characteristics of typical devices.

\* In all cases, the current data sheet information for a given device is the final design guideline and the only actual performance specification.

\* VISHAY Semiconductors does not assume any liability arising from the model use. VISHAY Semiconductors reserves the right to change models without prior notice.
