### DESCRIPTION / APPLICATIONS

The VS-UFL330FA60 insulated modules integrate two state of the art ultrafast recovery rectifiers in the compact, industry standard SOT-227 package.

Gen 4 FRED technology, state of the art, ultra low  $V_F$ , soft switching optimized for IGBT F/W diode.

The minimized conduction loss, optimized storage charge, and low recovery current minimized the switching losses and reduce the over dissipation in the switching element and snubbers.
