# Thin Film Center-Tapped Resistor Divider Network

Product may not be to scale

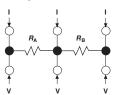

The CTT series resistor chips offer a combination of low shunt capacitance and excellent stability. The CTT offers the designer flexibility in use as either a single value resistor or as two resistor with a center tap feature.

The CTTs six bonding pads allows the user increased layout flexibility. The CTTs tantalum nitride resistor material offers excellent resistance to high moisture environments.

The CTTs are manufactured using Vishay Electro-Films (EFI) sophisticated thin film equipment and manufacturing technology. The CTTs are 100 % electrically tested and visually inspected to MIL-STD-883, method 2032 class H or K.

#### **APPLICATIONS**

The CTT center-tapped resistor chips are used mainly in feedback circuits of amplifiers where ratio matching, tracking, low shunt capacitance and better frequency response are necessary.

Vishay EFI measures low-value resistors by the four-wire kelvin technique.
