

Optoisolators in Inverter and Energy Storage Systems

Key Components for Inverter and Energy Storages

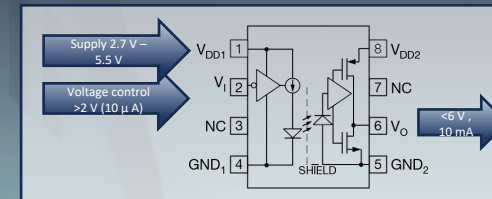

Vishay's large portfolio of Optoisolators delivers high-performance components for inverter and energy storage applications, including high-speed couplers for precise metering, optical gate drivers for efficient inverter operation, high-voltage couplers for robust Battery Management Systems (BMS), and versatile solid-state relays for control units. Backed by expert technical support, our solutions ensure optimal safety and functionality, meeting the most demanding industry standards.

VOIH72A

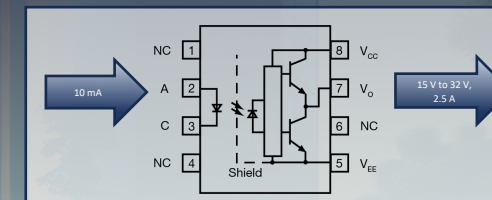

High Speed Metering

VOW3120

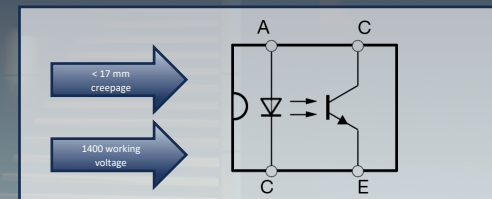

Isolated Gate Driver

CNY65

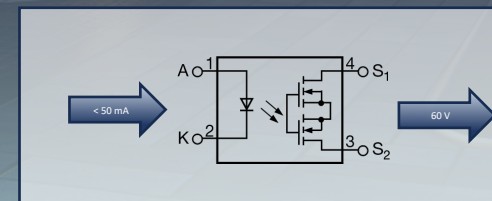

High Voltage Isolators

VO1400AEF

Reliable Solid-State Relays
