Long Life Cermet Potentiometer up to 2 Million Cycles

Their excellent performances are due to the use of a cermet-track sealed in a large case. P13 interchangeability with RV6, combined with the excellent stability of its rated characteristics make it fully acceptable for industrial and professional uses.

FEATURES
- 2 million cycles for bushing L and N
- 1 million cycles for bushing T, Q, O, and P
- High power rating 1.5 W at 70 °C
- Test according to CECC 41000 or IEC 60393-1
- Cermet element
- Fully sealed case
- Mechanical strength
- Custom designs on request
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

**OPTIONS**

- **Special feature command shaft**
  Length is measured from the mounting surface to the free end of the shaft. The screwdriver slot is aligned with the wiper within ± 10°. Special shafts are available, in accordance to drawings supplied by customers. We recommend that customers should not machine tool shafts, in order to avoid damage. Bending or torsion of terminals should also be avoided.

- **Potentiometers P13LT and P13LL**
  These potentiometers can be fitted with a device providing sealing between the threaded bushing and the front panel. Their designation is P13LP and P13LN respectively or with a locating peg P13LP...E and P13LN...E.

- **Panel sealed version**
  P13LP
  P13LP...E: Including locating peg

- **Panel cutout**
  P13LP
  3.9 ± 0.2

- **Panel sealed version**
  P13LN
  P13LN...E: Including locating peg

- **Panel cutout**
  P13LN
  6.9 ± 0.2
Shaft locking

On potentiometers equipped with a 3 mm Ø shaft, shaft locking can be obtained:

- Either by a taper nut tightening a slotted bushing. Ask for P13LO type. These devices are normally equipped with an AB type shaft (12.5 mm with a slot).

  P13LO

- Or by a tightening nut locked by a screw. Ask for ES1 type. On potentiometers equipped with a Ø 6 mm shaft, locking can be obtained by a taper nut applying pressure on a slotted notched washer. This device is supplied in a box as an accessory. Ask for DBAN. These devices are ordered separately. Please consult Vishay Sfernice.

  P13LL DBAN

No locking on shaft Ø 4 mm.

MARKING

Printed:
- Vishay trademark
- Part number (including ohmic value code, tolerance code and taper)
- Manufacturing date code
- Marking of terminals

APPLICATION NOTE

The potentiometer shall be used in voltage divider with an impedance load at least 100 times higher than the total potentiometer nominal resistance value.

Advised load impedance:
1 MΩ min. for resistance range of 1 kΩ to 50 kΩ

PACKAGING

- In box of 8 pieces for shafts FR and FQ
- In box of 10 pieces for shafts FE, FL, FG, and FK
- In box of 15 pieces for shafts AJ and EJ
- In box of 25 pieces for shafts AB, AA, EA, and EB

Hardware: nuts, washer, and O-ring are separately supplied (not mounted on the potentiometer), in a small bag placed in the packaging.
