ESCC 4001/026 Qualified () High Stability Thick Film Resistor Chips

www.vishay.com

• SMD wraparound chip resistor

- Generic specification ESCC 4001
- Detailed specification ESCC 4001/026
- Robust terminations
- Large ohmic value range 1 Ω to 10 $M\Omega$
- HCHP option 0.55: For high frequency applications (up to 10 GHz)
- ESA () qualified
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

LINKS TO ADDITIONAL RESOURCES

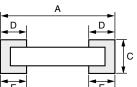

Vishay Sfernice thick film chip resistors CHPHR are specially designed to meet the requirements of the ESA 4001/026 specification. They have undergone the CNES evaluation (Space French National Agency). They are in level 1 of the ESA EPPL (European Preferred Part List) and ESA qualification is on-going.

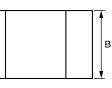

Thin film technology terminations, with nickel barrier, are very convenient for high operating conditions. They can withstand thousands of very severe thermal shocks.

B (W/A) type is for solder reflow assembly (variant 01 to 05)

G (W/A) type is for gluing (variant 06 to 10)

Vishay Sfernice

TRACEABILITY DEFINITIONS

The two major traceability elements are defined as:

- The primary process lot number named Front End lot (FE lot). One "FE lot" is composed of several wafers issued from the same thin film deposition sequence.
- The date code named Batch Number (BN). The "BN" is defined after completion of the end of production testing sequence.

The lot homogeneity is given by the "FE lot" and not by the "BN".

According to the applied rules validated by the ESCC through the product qualification, the following situations are agreed:

- Parts coming from different "FE lot" might have the same "BN".
- A maximum of two different "BN" might be applied to the same "FE lot" to enable the use of overruns from a previous PO.
- Unless requested / approved by the customer the "BN" will be 2 years old maximum.

SPECIFIC TRACEABILITY REQUIREMENTS

The following specific requirements have to be treated as:

- A customer who requires "Lot Homogeneity" has to mention it on the PO as "SINGLE PRODUCTION LOT".
- A customer who requires "Lot Homogeneity" in addition to a "Single Batch Number" has to mention it on the PO as "SINGLE PRODUCTION LOT AND OPTION R0101".

END OF PRODUCTION TESTING

Mandatory testing performed at the end of the production process:

- 100 % overload: voltage $\sqrt{(6.25 P_n \times R_n)}$ or 2 U_L whichever is less duration 2 s
- 100 % burn in: 168 h at P_n at 70 °C

OPTIONS

LOT VALIDATION TESTING

For procurement of qualified components, lot validation testing is not required and shall only be performed if specifically stipulated in the purchase order.

For procurement of unqualified components, lot validation testing shall be performed as stipulated in the purchase order. The need for lot validation testing shall be determined by the orderer.

When lot validation testing is required, it shall consist of the performance of one or more of the tests or subgroup test sequences of chart F4 indicated in the ESA generic specification ESCC 4001. The testing to be performed and the sample size shall be as stipulated in the purchase order. When procurement of more than one component type is involved from a family, range or series, the selection of representative samples shall also be stipulated in the purchase order.

Lot validation testing will be composed of one LVT charges and LVT samples:

Lot validation test charges has to be ordered separately on purchase order.

Lot validation samples have to be ordered separately on purchase order.

FINAL INSPECTION

If requested by the orderer a final inspection can be performed on site.

Final inspection has to be stipulated separately on purchase order.

Vishay

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
