

Low Capacitance, Low Charge Injection, 4- / 8-Channel, Triple SPDT, ± 5 V / 12 V / 5 V / 3 V Analog Multiplexers

DESCRIPTION

The DGQ4051E, DGQ4052E, and DGQ4053E are high precision CMOS analog multiplexers. The DGQ4051E is an 8-channel multiplexer, the DGQ4052E is a dual 4-channel multiplexer, and the DGQ4053E is a triple 2-channel multiplexer or triple SPDT.

The DGQ4051E, DGQ4052E, and DGQ4053E feature low leakage, parasitic capacitance, and low charge injection of 0.3 pC over the full voltage range. These devices are ideal for high precision signal switching and multiplexing.

Designed to operate from a 3 V to 16 V single supply or from a ± 3 V to ± 8 V dual supplies, the DGQ4051E, DGQ4052E, and DGQ4053E are fully specified at 3 V, 5 V, 12 V and ± 5 V. All control logic inputs have guaranteed 2 V logic high limit when operating from 5 V or ± 5 V supplies and 1.4 V when operating from a 3 V supply.

All switches conduct equally well in both directions, offering rail to rail analog signal switching and can be used both as multiplexers as well as de-multiplexers.

The DGQ4051E, DGQ4052E, and DGQ4053E operating temperature is specified from -40 °C to +125 °C and are available in 16 pin TSSOP package.

BENEFITS

- Wide operation voltage range
- Low charge injection
- Low parasitic capacitance
- Compact package option

FEATURES

- Automotive product AEC-Q100 qualified (Grade 1)
- Specified from -40 °C to +85 °C and from -40 °C to +125 °C
- 3 V to 16 V single supply or ± 3 to ± 8 V dual supply operation
- Low parasitic capacitance:
 - $C_{D(ON)}$: 8.5 pF / typ. (DGQ4053E)
 - $C_{S(OFF)}$: 2.0 pF / typ. (DGQ4053E)
- Less than 0.3 pC charge injection over the full signal swing range
- Low leakage: < 50 pA, typ.
- Fast switching t_{ON} : 35 ns, typ.
- 3 V logic compatible for control
- Bi-directional rail to rail signal switching
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

RoHS COMPLIANT

APPLICATIONS

- Automotive battery management systems
- Automotive infotainment and telematics
- Automotive analog and digital signal multiplexing / demultiplexing

FUNCTIONAL BLOCK DIAGRAM AND PIN CONFIGURATION

ENABLE = LO, all switches are controlled by addr pins.
ENABLE = HI, all switches are off.

MARKING INFORMATION

ORDERING INFORMATION

ORDERING PART NUMBER	CONFIGURATION	MARKING	TEMPERATURE RANGE	PACKAGE	MIN. ORDER / PACKAGING QUANTITY
DGQ4051EEQ-T1-GE4	8:1 x 1	Q4051E	-40 °C to +125 °C ^a	16-pin TSSOP	Tape and reel 3000 units
DGQ4052EEQ-T1-GE4	4:1 x 2	Q4052E			
DGQ4053EEQ-T1-GE4	2:1 x 3	Q4053E			

Note

a. -40 °C to +85 °C datasheet limits apply

ABSOLUTE MAXIMUM RATINGS ($T_A = 25\text{ °C}$, unless otherwise noted)

PARAMETER	LIMIT	UNIT
V+ to V-	-0.3 to +18	V
GND to V-	-18	
Digital inputs ^a , V _S , V _D	(V-) - 0.3 to (V+) + 0.3 or 30 mA, whichever occurs first	
Continuous current (any terminal)	30	mA
Peak current, S or D (pulsed 1 ms, 10 % duty cycle)	100	
Storage temperature	-65 to +150	°C
Power dissipation ^b	16-pin TSSOP ^c	mW
Thermal resistance ^b	16-pin TSSOP ^c	°C/W
ESD human body model (HBM); per AEC-Q100-002	2000	V
ESD charged device model (CDM), per AEC-Q100-011	750	V
Latch up current, per AEC-100-004 (JEDEC® class II)	100	mA

Notes

a. Signals on SX, DX, or INX exceeding V+ or V- will be clamped by internal diodes. Limit forward diode current to maximum current ratings

b. All leads welded or soldered to PC board

c. Derate 5.6 mW/°C above 70 °C

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Negative supply current	I-		Room	-0.05	-1	-	-1	-			
			Full	-	-10	-	-10	-			
Ground current	I _{GND}		Room	-0.05	-1	-	-1	-			
			Full	-	-10	-	-10	-			

Notes

- a. V_{IN} = input voltage to perform proper function
- b. Room = 25 °C, full = as determined by the operating temperature suffix
- c. Typical values are for DESIGN AID ONLY, not guaranteed nor subject to production testing
- d. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this datasheet
- e. Guaranteed by design, not subject to production test

TYPICAL CHARACTERISTICS (25 °C, unless otherwise noted)

On-Resistance vs. Analog Voltage (Single Supply)

On-Resistance vs. Analog Voltage (Dual Supply)

On-Resistance vs. Analog Voltage (Temperature)

On-Resistance vs. Analog Voltage (Temperature)

On-Resistance vs. Analog Voltage (Temperature)

Supply Current vs. Input Switching Frequency

TYPICAL CHARACTERISTICS (25 °C, unless otherwise noted)

Leakage Current vs. Temperature

Leakage Current vs. Temperature

Switching Time vs. Temperature (Single Supply)

Switching Time vs. Temperature (Dual Supply)

DGQ4051E Insertion Loss, Off-Isolation, Crosstalk vs. Frequency

DGQ4052E Insertion Loss, Off-Isolation, Crosstalk vs. Frequency

TYPICAL CHARACTERISTICS (25 °C, unless otherwise noted)

DGQ4053E Insertion Loss, Off-Isolation, Crosstalk vs. Frequency

Switching Threshold vs. V_+ Supply Voltage

DGQ4051E Charge Injection vs. Analog Voltage

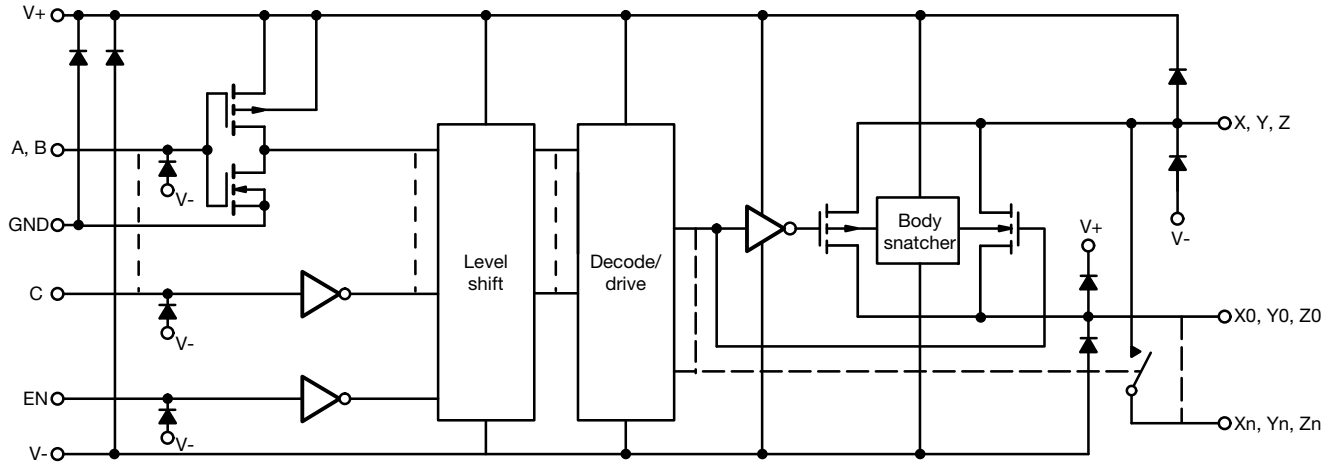

DGQ4053E Charge Injection vs. Analog Voltage

DGQ4052E Charge Injection vs. Analog Voltage

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations. For related documents such as package/tape drawings, part marking, and reliability data, see www.vishay.com/ppg?79297.

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Hyperlinks included in this datasheet may direct users to third-party websites. These links are provided as a convenience and for informational purposes only. Inclusion of these hyperlinks does not constitute an endorsement or an approval by Vishay of any of the products, services or opinions of the corporation, organization or individual associated with the third-party website. Vishay disclaims any and all liability and bears no responsibility for the accuracy, legality or content of the third-party website or for that of subsequent links.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
