Single MOSFET Driver Application

### DESCRIPTION

The VOMDA1271 is an automotive qualified optically isolated MOSFET driver. The VOMDA1271 obtains all the required current to drive its internal circuitry from the infrared emitter on the low voltage, primary side of the isolation barrier. No power supply is needed to provide  $V_{CC}$ . The VOMDA1271 features a turn-off circuit to achieve a fast turn off of the MOSFET.
