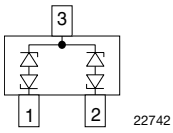
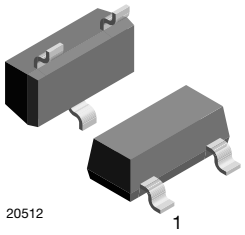
Two-Line Bidirectional ESD-Protection Diode in SOT-23



22742



20512

1

FEATURES

- SOT-23 package
- 2-line bidirectional ESD-protection
- AEC-Q101 qualified available
- OPEN Alliance 100Base-T1 and 1000Base-T1 compliant
- Working range ±24 V
- Trigger voltage >100 V
- Capacitance < 2 pF
- ESD immunity acc. ISO 10605 and IEC 61000-4-2 (150 pF/330 Ω)
  ±15 kV (1000 x contact discharge)
- Lead plating: Sn (e3)
  - Soldering can be checked by standard vision inspection
  - AOI = Automated Optical Inspection
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

AUTOMOTIVE GRADE Available

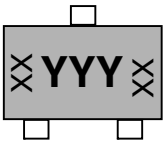
Pb-free

e3

RoHS COMPLIANT

HALOGEN FREE GREEN (5-2008)

MARKING (example only)



20357

YYY= type code (see table below)
XX = date code

PACKAGE DATA

DEVICE NAME	PACKAGE NAME	TYPE CODE	WEIGHT	MOLDING COMPOUND FLAMMABILITY RATING	MOISTURE SENSITIVITY LEVEL	SOLDERING CONDITIONS
VETH100A203S	SOT-23	2S	9.2 mg	UL 94 V-0	MSL level 1 (according J-STD-020)	Peak temperature max. 260 °C

ABSOLUTE MAXIMUM RATINGS (T_{amb} = 25 °C, unless otherwise specified)

PARAMETER	TEST CONDITIONS	SYMBOL	VALUE	UNIT
ESD immunity	Contact discharge acc. ISO 10605 and IEC 61000-4-2 (150 pF/330 Ω); 1000 pulses	V_{ESD}	15	kV
Operating temperature	Junction temperature	T_J	-55 to +150	°C
Storage temperature		T_{stg}	-55 to +150	°C

ELECTRICAL CHARACTERISTICS (T_{amb} = 25 °C, unless otherwise specified)						
PARAMETER	**TEST CONDITIONS / REMARKS**	**SYMBOL**	**MIN.**	**TYP.**	**MAX.**	**UNIT**
Protection paths	Number of lines which can be protected	$N_{channel}$	-	-	2	lines
Stand off voltage	Max. working voltage	V_{RWM}	-	-	24	V
Leakage current	At V_R = 24 V	I_R	-	0.001	0.1	µA
Trigger voltage	Transmission line pulse (TLP) = 100 ns; I_{TLP} = 1 A	V_T	100	-	-	V
Clamping voltage	At I_{TLP} = 1 A, t_p = 100 ns (TLP)	V_C	26	31	-	V
	At I_{TLP} = 10 A, t_p = 100 ns (TLP)	V_C	-	34	-	V
Dynamic resistance	t_p = 100 ns (TLP)	r_{dyn}	-	0.4	-	Ω
Capacitance	At V_R = 0 V; f = 1 MHz; V_{AC} ±10 mV	C_D	-	1.75	2	pF
	At V_R = 0 V; f = 1 MHz; V_{AC} ±1 V	C_D	-	1.45	-	pF

TECHNICAL NOTE

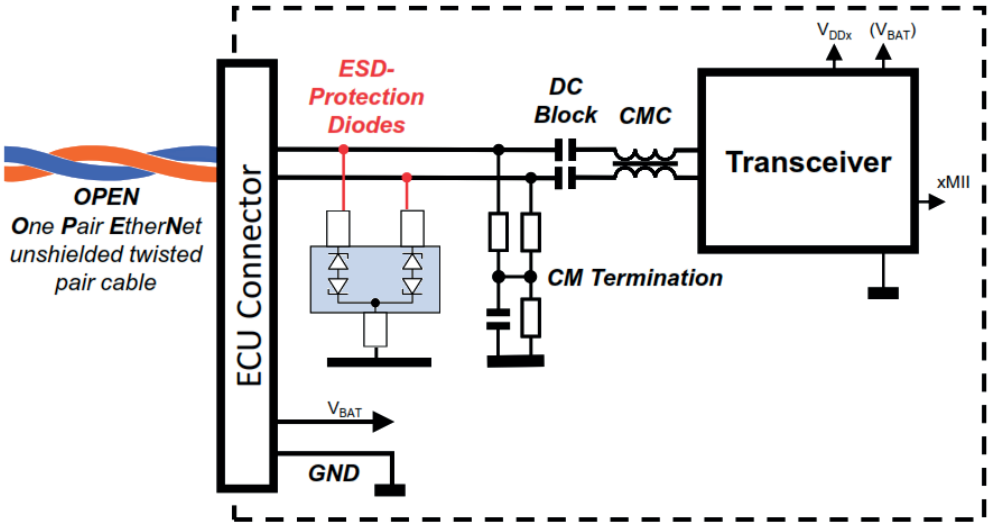
The ESD protection diode VETH100A203S is a two line, bidirectional ESD-protection diode made for Automotive EtherNet which meets the OPEN Alliance specifications IEEE 100BASE-T1 EMC Test Specification for Suppression Devices and IEEE 1000BASE-T1 EMC Test Specification for Suppression Devices.

The OPEN Alliance specifications specify various tests with the ESD protection diode mounted on test boards simulating the real environment in Automotive Ethernet application.

The test reports include the device classification according to related test specification such as:

- Mixed mode S-parameter measurement
- Damage from ESD
- ESD discharge current measurement and
- Unwanted clamping effect at RF immunity tests

The test reports are available on request (mail to: ESDprotection@vishay.com)



Connected between data line and ground the VETH100A203S blocks voltages between -100 V and +100 V with low leakage current. Such high voltages can be induced in the unshielded twisted One Pair EtherNet (OPEN) cables by electromagnetic fields from anywhere in and around the vehicle where the in-vehicle-network is installed.

It needs a trigger voltage V_T above 100 V to trigger the voltage snap-back of the ESD-protection diode. In its snap-back state, the VETH100A203S effectively clamps ESD pulses down to around 30 V (at I_{TLP} = 1 A). Additionally with this low dynamic resistance r_{dyn} the clamping voltage is only slightly depending on the current flowing through the diode to ground.

The very low capacitance C_D makes the VETH100A203S invisible for the data signals, so that the data rate on the Automotive EtherNet network will not be affected.

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, “Vishay”), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
