# **FEATURES**

Power MOSFET

- Surface-mount (IRFBC40S, SiHFBC40S)
- Low-profile through-hole (IRFBC40L, SiHFBC40L)
- Available in tape and reel (IRFBC40S, SiHFBC40S)
- Dynamic dV/dt rating
- 150 °C operating temperature
- Fast switching
- · Fully avalanche rated
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

#### Note

This datasheet provides information about parts that are RoHS-compliant and / or parts that are non RoHS-compliant. For example, parts with lead (Pb) terminations are not RoHS-compliant. Please see the information / tables in this datasheet for details

#### DESCRIPTION

Third generation power MOSFETs from Vishay provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The D<sup>2</sup>PAK is a surface-mount power package capable of the accommodating die sizes up to HEX-4. It provides the highest power capability and the lowest possible on-resistance in any existing surface-mount package. The D<sup>2</sup>PAK is suitable for high current applications because of its low internal connection resistance and can dissipate up to 2.0 W in a typical surface-mount application. The through-hole version (IRFBC40L, SiHFBC40L) is available for low-profile applications.
