

About Panel – Inductors and Magnetics

0:03

The Inductors Division of Vishay is well established in the magnetics market, with an extensive variety of products for a multitude of applications.

0:12

With the ability to offer custom magnetic solutions and a full range of standard products, the Inductors Division focuses on high reliability, high quality performance at a competitive price.

0:26

The Inductors Division has over 50 years of experience in design and manufacture of custom magnetics and is the number one supplier for inductors, Transformers and antennas for implantable medical devices such as pacemakers and defibrillators.

0:44

Small size and high reliability are essential since lives depend on these products.

0:50

On the standard product side, Vishay offers over 27,000 individual inductors and Transformers for nearly every application, including automotive, industrial, telecom, aerospace and computing markets.

1:06

Leading the way is our flagship IHLP composite powdered iron power inductor, which uses technology that Vishay invented.

1:16

We continue to innovate with this technology and provide the most robust and highest energy storage density inductors on the market today.
