

Starter Sample Kit Wirebondable Thin Film Chip Resistors

The sample kit contains 4 values of each part family with 10 pieces each. The SFM (top contact single value resistor), BCR (back contact resistor) and CTR (center tapped voltage divider network).

FEATURES

- SFM - top contact single value chip resistor 0202
- BCR - back contact chip resistor 0202
- CTR - center tapped voltage divider network 0303
- Standard thin film chip resistors that can be used in a variety of applications that require tight tolerances and high reliability in military, medical, telecommunications, and industrial industries
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912
