170 RVZ Series High Ripple Current Aluminum Electrolytic Capacitors Sample Kit Now Available

We're offering a new sample kit featuring our 170 RVZ series high ripple current radial aluminum capacitors. The sample kit offers a selection of the most important capacitance and voltage values for the devices. It is available via our distribution partners, or by ordering directly using the code shown below.

Ordering Code

- 170 RVZ sample kit: [MAL217099001E3](https://www.vishay.com/doc?28497)

Key Advantages

- Very low impedance and low ESR in smaller case sizes than the 150 RMI series
- High ripple currents up to 3.8 A
- Very long useful life of up to 10 000 h
- AEC-Q200 qualified for higher reliability
- IATF 16949 certified manufacturer
- Manufactured in the EU
